John,

Here is the presentation I gave Merrylin on the status of Tier 2 phase-in. As for diesels, the only light-duty diesel models for 2006 are the Mercedes E320, Jeep Liberty, VW Beetle, VW Golf, VW Jetta, and VW Touareg. All are certified to bin 10. For 2007, the LDVs **CBI / Ex. 4** and the SUVs will **CBI / Ex. 4**. For 2008, the E320 will certify to bin 5 and will be equipped with a **CBI / Ex. 4** (I don't know if that is public knowledge yet). VW hasn't told us about their 2008 plans yet.

All of the current diesel models are using engine controls (FI, EGR, etc.) with a DOC. Only the **CBI / Ex. 4** is using a PM filter. None of the vehicles use a **CBI / Ex. 4** or **CBI / Ex. 4**.

Hope this helps. Let me know if you have any other questions.

Linc

Hi Linc. Dan said you did some presentation stuff for MZM a while back. I'm looking for up to date Tier 2 slides that might show how manufacturers are doing in the phase in etc. Anything else, too. I've got to do a presentation at an international conference on diesel emission control in the US. So if you have anything on how diesels are doing or are expected to do, that would be really helpful. thanks
